EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. David R. Cochran on September 14th, 2004.

The application has been amended as follows:

In independent claim 1, line 10, after "reduce the oxides", insert --, wherein the anode is formed from titanium or titanium/platinum--.

In dependent claim 11, line 1, after "the method of claim", delete "12" and insert -47--.

In independent claim 12, line 12, after "oxides", insert --, wherein the anode is formed from titanium or titanium/platinum--.

In dependent claim 24, line 2, after "titanium or", delete "titanized platinum, platinum, or copper" and insert --titanium/platinum--.

In independent claim 25, lines 10-11, after "oxides", insert --, wherein the anode is formed from titanium, platinum, or titanium/platinum--.

In independent claim 26, lines 9-10, after "or mixtures thereof", insert --, wherein an anode used to electrochemically reduce oxides is formed from titanium/platinum--.

In independent claim 32, line 6, after "reaction cell", insert --, wherein the anode is formed from titanium or titanium/platinum--.

Art Unit: 2823

In independent claim 44, lines 9-10, after “reaction cell”, insert --, wherein the anode is formed from titanium, platinum, or titanium/platinum--.

In independent claim 45, line 9, after “reaction cell”, insert --, wherein the anode is formed from titanium or titanium/platinum--.

In independent claim 47, lines 14-15, after “ethylene diamine tetra acetate”, insert --, wherein the anode is formed from titanium, platinum, or titanium/platinum--.

Allowable Subject Matter

Claims 1-9, 11-14, 16-41, and 43-57 are allowed.

Reasons For Allowance

The following is a statement of reasons for the indication of allowable subject matter: The prior art taken alone or in combination neither discloses nor makes obvious the instant process of claims as a whole. Specifically, the prior art of record, Lopatin et al. (U.S. Patent 6,555,909) discloses a method of metallizing a substrate, comprising: depositing a dual-purpose layer (FIG. 3: 232) on the substrate wherein a first purpose is to serve as a barrier layer and a second purpose is to serve as a seed layer (col. 5, lines 42-47); and electrochemically depositing a conductive interconnect layer (FIG. 3: 236) on the surface of the dual-purpose layer using a second electrolyte (col. 5, line 62 to col. 6, line 43) but fails to teach or suggest the Applicant's steps of electrically reducing oxides on the surface of the dual-purpose layer using a first electrolyte where the first electrolyte includes a cation species of material of an anode in an electrochemical reaction cell, electrochemically depositing a conductive interconnect layer on the surface of the dual-purpose layer using a second electrolyte, wherein the conductive interconnect layer

Art Unit: 2823

includes conductive material other than the cation species in the first electrolyte used to electrochemically reduce the oxides, wherein the anode is formed from titanium or titanium/platinum as recited in the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
